DETAILED ACTION

Claim Objections

Claims 1,4-7 are objected to because of the following informalities:

Claim 1, “appling” should be “applying”.

Claim 4 “Claims” should be “Claim”.

Claims 5-7, “one of Claims” should be “Claim”.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Auger et al.

Auger et al. expressly discloses a method of fumigating a chamber or structure with methyl disulphide falling within the scope of applicant’s claims (Pg. 201, Table 1. [evidence supporting express disclosure].

Alternatively, at the very least the claimed invention is rendered obvious within the meaning of 35 USC 103, because the prior art discloses products and uses that contain the same exact ingredients/components as that of the claimed invention. See *In re Fitzgerald*, 205 USPQ 594 (CCPA 1980). See also *In re May*, 197 USPQ 601, 607 (CCPA 1978). See also *Ex parte Novitski*, 26 USPQ2d 1389, 1390-91 (Bd Pat. App. & Inter. 1993).

Double Patenting

Claims 1-7 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7 of copending Application No. 10/472083 in view of Auger et al.

The difference between the claims of the present application and the copending application is that the copending application does not indicate that claimed substrate includes chambers or structures.

Auger et al. disclose the fumigation of insects in a fumigation chamber with methyl disulfide (Pg. 201, Table 1).

As such, it would have been well within the skill of and one of ordinary skill in the art would have been motivated to modify the claims of the copending application to indicate that the substrate includes chambers or structures with the expectation that methyl disulfide would be effective as a pesticide in the same.

This is a provisional obviousness-type double patenting rejection.

Therefore, the claimed invention, as a whole, would have been *prima facie* obvious to one of ordinary skill in the art at the time the invention was made, because every element of the invention has been collectively taught by the combined teachings of the references.
